## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-27, are drawn to a transaction system for performing secure transactions over a communication network classified in class 705, subclass 78.
  - II. Claims 28-29, drawn to a method for identifying a party, classified in class 713, subclass 156
2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention 1 has separate utility such as performing secure transactions utilizing a separate security server to prevent other parties from identifying the buyer. Invention 2, can be used to identify a party from among a plurality of parties and can authenticate that identity of the party is unique.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group 1 is not required for Group 2, restriction for examination purposes as indicated is proper.

Art Unit: 3621

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
